NOTIFICATION.

No. 3786A.D.—The 28th September 1920.—The following is substituted for the existing paragraph 5 of rule 26 in Section III of the Rules for the Departmental Examination of Assistant Magistrates and others, dated the 14th September 1912 :—

"Probationary Assistant Superintendents of Police will be required to appear for the Lower Standard in Law at the first half-yearly examination held after their arrival at the school ; but at subsequent examinations they will be permitted to present themselves for examination in that subject for both standards at the same time. If, however, any such officer liable to pass in the first paper without books by the Lower Standard in Law obtains the minimum marks prescribed for passing in the same paper without books by the Higher Standard, he will be adjudged to have passed both in the Lower and the Higher Standards in this paper. Probationers will also be required to appear for the Lower Standard in Bengali at the first half-yearly examination held after their arrival at the school, but unless they have had a working knowledge of Bengali before they became probationers or have shown unusual aptitude for the language in their studies at the school, it is unlikely that they will prove successful, and no discredit will attach to failure They should, however, be able to pass at the second half-yearly examination, at which (unless they have passed earlier) they will be required to appear in Bengali by the Lower Standard, but will not be allowed to appear in the examination by the Higher Standard. At subsequent examinations they will be permitted to present themselves for examination, either for the Higher Standard, if the Lower Standard has already been passed, or for the Lower Standard or for both Standards at the same time.

H. L. STEPHENSON,

RULES.

1. In these rules :—

(*ii*) "Veterinary Officer" means the Principal, Bengal Veterinary College ;

(*iii*) "Quarantine Officer" means the Principal, Bengal Veterinary College ;

(*v*) "Valid Certificate" means a certificate pronounced as genuine by the Veterinary Officer after he has satisfied himself that it refers to the kine purporting to be covered by it and that it has been granted within one month before the date of shipment. In the case of Ceylon, the certificate must specify that the kine were bred in Ceylon and in the case of other countries mentioned in the Schedule it must certify that the kine are free from bovine tuberculosis ;

(*vi*) "An officer of the Veterinary Department" means an officer of the Bengal Civil Veterinary Department deputed by the Principal, Bengal Veterinary College.

2. Whenever a vessel carrying kine from a foreign port arrives off Saugor Island, the Master of the vessel shall report to the pilot in charge of the vessel the fact of such kine being on board, and the pilot shall immediately telegraph to the Veterinary officer advising the arrival of the vessel.

The Master shall not allow the landing of the kine and of the appurtenances without the permission of the Veterinary officer.

N.B.—The telegraphic address of the Veterinary officer is "Bencol", Calcutta.

3. The Veterinary Officer shall make immediate arrangements for the attendance of an officer of the Veterinary Department on the vessel and for the landing and detention in quarantine of kine imported from countries not mentioned in the schedule and of such kine from the countries mentioned in the schedule as are not accompanied by a valid certificate.

5. The owner or person in charge of the kine shall, if so ordered by the Veterinary officer, assist in landing of the kine and in taking them to the quarantine station.

6. The kine shall be detained at the quarantine station in such manner as may be directed by the Veterinary officer until such time as they are certified to be free from tuberculosis. The period of detention may extend to three months but if the owner or person in charge of the kine makes a written request to the Veterinary officer for the application of the tuberculin test, the period of detention may be reduced by him to a period not less than twenty-one days from the date of the application.

7. During detention in quarantine the kine shall be under the entire control of the Veterinary officer, no outsider being allowed access to them nor to feed them without the express permission of the Veterinary officer. 8. Where the Veterinary officer considers it necessary, the owner or consignee of the kine shall deposit in advance a sum of money necessary to defray the cost of detention in quarantine and other incidental expenses.

9. Kine found to be affected with tuberculosis shall be destroyed and their carcases and all appurtenances disposed of in accordance with the order of the Veterinary officer without compensation. The value of any portions of the carcase or appurtenances of which sale is permitted shall be refunded to the owner or consignee after deducting the charges due from him.

10. Kine detained in quarantine shall not be removed from the quarantine station without the permission of the Veterinary officer, and such permission shall be withheld until the kine are certified to be free, of tuberculosis and until all charges have been paid.

11. In default of payment of such charges the kine shall be sold and the charges shall be met from the price realised, the balance, if any, shall be made over to the owner or consignee.

Netherlands Indies—Regulations for entering Zee-Gats and Harbours.

No. 272 (third publication).—The following particulars, etc., relative to the above, issued by the British Admiralty (No. 1228 of 1920), are republished :—

The following regulations have been made by the Netherlands Government :—

Manœuvres or other causes may necessitate the closing of the various zee-gats and harbours or may make their entry subject to special reservations.

Upon such occasions a signal in the shape of 3 red balls by day and 3 red vertical lights by night will be made from some conspicuous position in the vicinity of the channel leading to the harbour or zee-gat.

When such signals are seen by a vessel approaching, the vessel, unless prevented by the direction of the wind or the state of the sea, must proceed towards the examination vessel stationed in the entrance to the zee-gat.

Permission or refusal to proceed will be given after examination. All vessels proceeding must do so under the charge of a pilot, or be preceded by a war-ship or pilot vessel, since from the time of making the signals all exemptions from the necessity of taking a pilot are cancelled. Captains and Masters of vessels are to carry out the instructions of the official who has come on board from the examination vessel and obey all signals.

If a shot is fired, where safety permits, the engines must immediately be stopped in the vicinity of the examination vessel. Failure to comply with these regulations may result in danger to the vessel and crew. As a general rule permission to enter by night will not be granted.

If a signal is made from the shore to intimate that vessels are subject to examination and if there is no examination vessel stationed in the zee-gat they must anchor or lie off.

The coming into operation of such regulations at any particular zee-gat or harbour will not be announced beforehand.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Cotton Corps of Bengal, 1920-21.

[***Note.*** *— On an average of the five years ending 1918-19, the area under the cotton crops in Bengal has represented some 0·3 per cent. of the total area under cotton in India.*]

THERE are two crops—early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore.

Character of the Season.—As reported in the first forecast the weather was generally unfavourable for the early crop both at the time of sowing and during the period of growth. Its present prospects are reported to be fair. The late crop is progressing well and its condition is promising.

Area sown.—The area sown with early cotton is reported to be 68,448 acres this year against 69,280 acres reported in the corresponding forecast of last year.

Of the late crop, 307 acres are reported to have been sown up to date, against 758 acres in the corresponding forecast of last year.

Director of Agriculture, Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Preliminary Forecast of the *Bhadoi* Crops of Bengal, 1920-21.

NOTE.—On an average of the five years ending 1918-19, the area under autumn rice in Bengal has represented some 6·3 per cent. of the total area under rice in British India.

Character of the Season.—Crop sowings generally commenced at the normal time in the eastern and northern districts, where the operations, however, were somewhat retarded by the excessive rain in March. The rain fall in April and May was insufficient for ploughing and sowing operations, especially in some west Bengal districts. But in eastern and northern Bengal there was adequate moisture in the soil, especially in the low-lying tracts, and the operations proceeded satisfactorily and were almost finished by the end of May, although a little more rain would have benefitted the growth of the crops. During the first part of June, the crops generally suffered from the continued drought, but the rainfall in subsequent months improved the situation. Considerable damage is reported to have been caused by drought in Birbhum, Dinajpur, Pabna, Malda and Tippera and by flood in July in parts of Midnapore. On the whole the season may be regarded as a fair one.

Acreage.—The total area sown with the different *bhadoi* crops this year is reported to be 5,922,000 acres against 5,991,900 acres and 5,827,800 acres respectively in the corresponding and final forecasts of last year. Of this the area under autumn rice is estimated at 5,088,200 acres this year, against 5,128,300 acres and 4,961,600 acres respectively in the corresponding and final forecasts of last year.

Outturn.—According to the district officers' estimates, the outturn of the different *bhadoi* crops for the province works out to 84 per cent. of the normal against 84 and 85 per cent. reported respectively in the corresponding and final forecasts of the last year. Autumn rice, the most important of the *bhadoi* crops, shows an outturn of 85 per cent. for the province this year, against 86 and 87 per cent. reported respectively in the corresponding and final forecasts of last year.

G. EVANS,
Director of Agriculture, Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Winter Rice Crop of Bengal, 1920-21.

[Note.—On an average of the five years ending 1918-19, the area under Winter Rice in Bengal has represented some 19·7 per cent. of the total area under rice in British India.]

Two crops, agriculturally distinct, are returned in the winter rice forecasts, one the broadcasted deep-water rice found mostly in Eastern Bengal and sown from the beginning of March onwards, the other and more important crop being transplanted from seed-beds in July and August. Early rainfall (not sufficient to cause flooding) suits the sowing of the broadcast crop and of seed-beds for the transplanted varieties. Good general rainfall in July and August permits of a large area of the transplanted crop being planted, while plentiful showers in October secure a full crop in those districts where the soil is, on account of its high situation or of its comparative porosity, not ideally suitable for paddy cultivation. Both crops are harvested about the same time, the main crop being generally cut in December.

Character of the season.—The rainfall in February and March was in excess of the normal and was sufficient for the preparatory tillage. Operations, however, were hampered in many places owing to scantiness of rainfall in April, May and the first part of June. The sowing of broadcast winter paddy and of seeds in nurseries commenced from April. The long spell of drought that prevailed up till the first part of June retarded the germination and growth of the crop in many parts, especially on high lands in some West Bengal districts. Moderate rain that fell in the latter part of June and in July and the slow rise of rivers generally improved the growth of the broadcast crop, but proved insufficient for the transplantation, of seedlings in many places, especially in the northern and some western districts. The deficiency of rainfall in July was, however, made up by the sufficient rainfall in August when a large area was put under transplantation, and the prospects of the broadcast crop since then have improved greatly. Damage by excessive rain and flood is reported from parts of Jessore, Hooghly, Howrah, Bogra, Dinajpur and Tippera. The disastrous floods in the Midnapore district caused damage to the extent of about 2 annas. The outlook, on the whole, may be regarded as favourable.

Acreage.—According to the figures returned by district officers the total area under the winter rice crop is 15,319,500 acres, as compared with 15,379,400 and 15,606,100 acres in the corresponding and final forecasts of last year. The decrease is to be attributed chiefly to want of rain at sowing time.

Outturn.—From the summary of the district returns appended it will be seen that six districts expect a normal crop; sixteen districts report a crop between 75 to 94, and the remaining five districts return between 50 to 67 per cent. of the normal. According to the above estimates, the provincial outturn works out to 83 per cent. as against 89 per cent. of the normal respectively in the first and final forecasts of last year. The averaging of district estimates for the first forecast has, however, not always proved a trustworthy means of arriving at the real provincial figures, as most of the outturn figures are based on the assumption of weather conditions prevailing at the time the reports were sent in. There is still time for the outturn of the transplanted crop to be affected by weather, and as a matter of fact the heavy rainfall of mid-September has greatly benefited the crop.

Nadia ...	186,800	180,100	185,200	67	67	April; normal	July; normal	The increase in area is due to the fact that this year's area is based on the actuals of the four thanas of the Sadar subdivision as furnished by the Settlement Officers for 1918 The weather was not favourable at the sowing time. The outturn is expected to fall below the normal for want of timely rainfall.
Murshidabad ...	351,400	318,700	290,900	83	83	Middle of June; late.	Middle of August; late.	The decrease in area is due to want of rain in the beginning which retarded the progress of transplantation, but conditions have now improved.
Jessore	468,100	455,800	459,100	83	83	April; normal	Latter part of June and July, rather late.	The increase in area is due to decrease in jute cultivation. The weather has been favourable for broad cast *aman* but rather unfavourable for the transplanted *aman*. About 3 annas of the crop have been damaged by flood in the Narail subdivision and 2 annas for want of rain in July.
Khulna ...	826,200	703,900	710,500	83	92	June; normal	Middle of July; normal.	The increase in area is due to favourable weather at the sowing time. Some damage has been done by drought in places.
Burdwan ...	874,800	736,000	667,700	75	83	Beginning of June to middle of August; late	Middle of July to middle of August; late	The decrease in area shown is due to want of timely rainfall The weather was not favourable at the outset but has subsequently been favourable
Birbhum ...	604,600	601,500	563,000	92	75	June, late ...	Latter part of July; late.	The decrease in area sown is due to want of timely rainfall. The weather has not been very favourable. Hence the outturn is below the normal
Bankura ..	510,600	525,000	525,000	125	100	.....	Middle of July, late.	Monsoon commenced late. Good rainfall since the time of transplantion has helped the growth of the crop.
Midnapore ...	1,587,100	1,549,200	1,624,800	83	75	June; normal	July and August, late	The drought at the beginning is likely to affect the growth of the crop to a certain extent. About 2 annas of the crop have been damaged by floods in the Tamluk and Ghatal subdivisions.
Hooghly ...	976,700	906,400	909,300	70	75	In Sadar subdivision, June and July; late. In Serampur beginning of July; normal. In Arambagh end of June; late.	In Sadar, July and August; late. In Serampur, middle of July; normal In Arambagh end of July, late	The increase in area sown is due to the high price of rice. Want of timely rain delayed transplantation in places and slight damage has also been caused by flood in the Arambagh subdivision.
Howrah ...	135,200	119,500	119,400	83	67	Middle of June; normal	Middle of July; normal.	The weather at the sowing time was unfavourable owing to drought, and excessive rain later on caused some damage Hence the low outturn.
Rajshahi ...	822,700*	656,200	630,000	92	83	April; normal	Latter part of July; normal.	The decrease in area as compared with that of last year is due to want of timely rainfall. For want of timely rain both the broadcast and transplanted paddy could not thrive. The fields have not been inundated; hence the outturn is expected to fall below normal.
Dinajpur ...	1,120,300	1,029,000	784,500	80	58	...	Middle of August, late	The decrease in area sown is due to want of timely rainfall. The weather has not been favourable. Continued drought has hindered the transplantation. Hence the outturn is expected to be much below the normal

Also the Indian Paper Currency (Amendment) Act No. XLV of 1920 authorises the issue of currency notes against sovereigns and half sovereigns at the new rate of Rs. 10 per sovereign and against gold bullion at the corresponding rate of Rupee one for 11·3C016 grains troy of fine gold. The Government of India have accordingly decided that, with effect from the 1st October 1920, sovereigns and half-sovereigns shall be valued at the rate of Rs. 10 per sovereign and gold bullion at Rupee one for 11·30016 grains troy of fine gold in all Government accounts inclusive of the accounts of the Paper Currency and Gold Standard Reserves.

2. Gold mohurs will however continue to be valued at Rs. 15 each in all Government accounts except those of the Paper Currency Reserve. Mohurs can now be held in that Reserve at their bullion value only, and when it becomes necessary to place mohurs in the Reserve hereafter, the difference between their equivalent at the 15 rupees rate and the value at which they can be held in the Reserve will be treated as an item of expenditure of Government.

3. All gold and securities held in the Paper Currency Reserve on the 1st October 1920 will be revalued in accordance with the provisions of the Paper Currency (Amendment) Act No. XLV of 1920, and the deficiency in the Reserve resulting from the re-valuation will be made up by twelve months' Treasury Bills of the Government of India issued by the Controller of the Currency to the Reserve.

RESOLUTION ON THE ANNUAL REPORTS OF THE VETERINARY COLLEGE AND OF THE CIVIL VETERINARY DEPARTMENT, BENGAL, FOR THE YEAR 1919-20.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agriculture.

CALCUTTA, THE 9TH OCTOBER 1920.

RESOLUTION—No. 9179Agri.

READ—

The annual reports of the Veterinary College and of the Civil Veterinary Department, Bengal, for the year 1919-20.

COLONEL A SMITH, Principal, Bengal Veterinary College, held charge of the College throughout the year. Mr P. J. Kerr joined the College as Second Imperial Officer towards the close of the year on the 26th March 1920. Colonel A. Smith also held charge of the Civil Veterinary Department on

account of the absence of the Superintendent on deputation to military duty, up to the 20th July 1919, when he was relieved of his additional duties by Mr. A. D. MacGregor.

2 The number of students at the Bengal Veterinary College at the end of the session was 158, of which number 64 belonged to Bengal, 56 to Bihar and Orissa and the rest to other provinces. Owing to 14 students leaving the College, there was a slight fall in the number of students, as compared with the preceding year's figure, which was 165; but there was a larger number of better qualified students. During the year 32 students graduated from the College, of whom nine belonged to Bengal: All the new graduates have been employed as veterinary assistants.

3. Though too much importance should not be attached to the comparison, the report of the Civil Veterinary Department shows a small decrease in the mortality of animals from contagious diseases during the year, the total number of deaths reported being 14,898 as against 15,569 in the previous year. There was, however, a noticeable increase in mortality from rinderpest, the number of deaths from which was 12,178 as against 10,772 in the previous year. This increase is primarily due to heavy outbreaks in the Tippera district. There were in all 537 outbreaks of rinderpest, hæmorrhagic septicæmia, and anthrax and 84,896 animals were inoculated as against 67,083 animals in 426 outbreaks in the previous year. The death-rate amongst the inoculated was only ·4 for the whole province; on the other hand seventeen times as many uninoculated animals died during the outbreaks. Leaflets dealing with the prevention and treatment of cattle diseases were freely distributed. The Governor in Council notices with satisfaction that the Superintendent, Civil Veterinary Department, is taking keen interest in the matter and is explaining more practical methods of work to veterinary assistants so that they may make themselves more useful to the people. Steps have also been taken to improve the agency for reporting outbreaks.

4. During the year under report the itinerant veterinary assistants visited 12,831 villages and treated 58,761 animals as against 13,462 villages and 58,025 animals in the previous year.

5. In Calcutta and its suburbs all the stables and cattle-sheds were regularly inspected. Glanders and farcy were detected in 30 stables and surra in 2, against 13 and 4, respectively, in the previous year. In the mufassal 7 deaths from glanders were reported as against 17 in the previous year.

6. The number of stud bulls kept by Government and local bodies increased from 104 in the previous year to 124 in the year under report. Of these 57 are the property of local bodies. The Governor in Council notices with satisfaction that a record is now being kept by the veterinary assistants of the services of stud bulls and of their results.

7. Four new dispensaries were established during the year, thus bringing the total number of such institutions up to 35 whilst it is satisfactory to note that other dispensaries are under contemplation. The number of patients treated at those dispensaries was 44,747 as against 43,312 in the previous year.

8. In accordance with paragraph 8 of the resolution on the last year's report, veterinary sub-committees were appointed in some districts: the scheme will be tried throughout the province in the current year. It is hoped that the members of the sub-committees will take an active interest in the work and thus prove their utility in dealing with the veterinary work of the districts.

9. The work of the Deputy Superintendent, Civil Veterinary Department. Veterinary Inspectors and the staff of the Bengal Veterinary College continued to be satisfactory.

His Excellency in Council has much pleasure in acknowledging the valuable services of Colonel Smith and in recording his appreciation of the work done by Mr. A. D. MacGregor.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

For the week ending on the, 7th October 1920.

Summary.—During the week, moderate rain fell over the greater part of North and East Bengal. Elsewhere the fall was generally light. The October rainfall, which is the mainstay of the winter paddy crop, is urgently needed, especially in West Bengal. The prospects of deep-water paddy are generally promising and those of transplanted paddy are fair. Preparation of lands for and sowing of pulses continues in certain districts. The average price of common rice for the province has fallen by about 0·87 per cent. as compared with that of the previous week.

Provided that the term of office of the members of the Committee shall be held to include any period which may elapse between its expiration and the date of the first meeting of a new Committee appointed to take its place.

7. A member of a Committee appointed under rule 3 may at any time be removed from office by the local authority or by the private body or private individual by whom the Committee was appointed.

8. If any member is unable to complete his full term of office or avails himself of leave granted by the Committee, the vacancy caused by his resignation or removal or death or absence on leave, shall be filled up by the appointment of another person, and the person so appointed shall hold office for the unexpired remainder of the term for which such member would otherwise have continued in office or during his absence on leave, as the case may be.

Nothing in this rule or in the preceding rule shall prevent the Managing Committee from accepting as a contribution to the funds of the institution shares or a deposit in a Co-operative Central Bank or money offered with the express instruction that it shall be invested in such shares or shall be so deposited. Neither shall it be necessary to convert shares or deposits so received into Government securities. The sub-vouchers appertaining to the former shall be submitted with the bill to the local authority. The totals under each column of the Imprest Register will be entered in the corresponding column of the cash-book when the recoupment bills are cashed.

The court shall make a note of any document produced in the column of remarks.

3. The court shall then, after such examination of the petitioner as it considers necessary, proceed either under section 78 or under section 80 of the Bengal Village Self-Government Act, 1919.

4. If any defendant does not reside within the jurisdiction of the court, the summons may be served by registered acknowledgment post, the postage for which shall be paid by the plaintiff or it may be sent for service to the president of the union board in which the defendant resides.

5. If the defendant appears and applies for time either to proceed under section 81 of the Bengal Village Self-Government Act, 1919, or to produce evidence, the court shall fix a date for the hearing, but unless the defendant declares his intention to move for a transfer under section 81, he shall be called on to answer the petition at once either orally or in writing.

6. When both sides are ready with their witnesses the court shall proceed to hear the case.

7. The petitioner shall have the right to begin unless the defendant admits the facts alleged by the plaintiff and contends that either in point of law or on some additional facts alleged by the defendant the petitioner is not entitled to any part of the relief which he seeks, in which case the defendant shall have the right to begin.

8. The party having the right to begin shall state his case and produce his evidence in support of the issue which he is bound to prove.

On abandonment of the whole or part of a claim the plaintiff shall pay the fee under section 90 of the Bengal Village Self-Government Act, 1919, in respect of the amount of the claim abandoned.

A payment or adjustment which has not been certified or recorded as aforesaid shall not be recognized by any court executing the decree.

14. At any time within three years of the signing of the decree, the successful party may apply to the court for execution of the decree

TRADE AFTER THE WAR.

Simla, the 9th October 1920.

No. 6783.—The following Notice to Importers in Great Britain and Ireland and to Exporters in British Overseas Dominions on the subject of preferential duties of Customs in Great Britain and Ireland on goods consigned from and grown, produced, or manufactured in the British Empire issued by His Majesty's Board of Customs and Excise is published for general information in continuation of this Department Notification No. 7386, dated the 20th September 1920 :—

NOTICE TO IMPORTERS IN GREAT BRITAIN AND IRELAND
and to
EXPORTERS IN BRITISH OVERSEAS DOMINIONS.

Preferential Duties of Customs in Great Britain and Ireland on Goods Consigned from and Grown, Produced, or Manufactured in the British Empire.

1. With a view to conferring a preference in the case of Empire products, the duties of customs on the goods specified in Appendix A are charged at the reduced rates shown in the second column of that Appendix, provided the goods are shown to the satisfaction of the Commissioners of Customs and Excise to have been (1) consigned from, and (2) grown, produced, or manufactured in, the British Empire. The "British Empire" for this purpose means all British Dominions outside Great Britain and Ireland, including British India and Indian Native States, and all British Protectorates. Any territories which may hereafter come under His Majesty's Protection, or in respect of which a Mandate of the League of Nations may be exercised by the Government of any part of His Majesty's Dominions, may be included by Order in Council.

2 Goods are not deemed to have been manufactured in the British Empire unless such proportion of their value as is prescribed by regulations made by the Board of Trade (printed as Appendix B) is the result of labour within the British Empire. This proportion has for the present been fixed at 25 per cent. of the factory or works cost to the manufacturer for all manufactured articles except manufactured tobacco, refined sugar, molasses, and extracts from sugar, for which the proportion is fixed at 5 per cent. (but *see* paragraph 3).

Each article is to be considered separately in applying the percentage test. The factors which may be taken into account in arriving at the total value and the proportion of Empire labour are laid down in Regulations 4 and 5 (Appendix B).

When manufactured goods are not liable to duty in themselves, but only in respect of the dutiable ingredient or ingredients they contain, preference can only be granted in respect of such of the ingredients as themselves satisfy the requisite conditions (*see* paragraphs 8-10 below).

3. Where the Board of Trade is satisfied as respects any class of goods to which the preferential rates apply that those articles are to a considerable extent manufactured in the British Empire from material which is not wholly grown or produced in the Empire, the Board may by order direct that the preferential rate shall be charged only in respect of such proportion of those goods as corresponds to the proportion of dutiable material used in their manufacture which is shown to have been grown or produced in the Empire

This provision has been applied by Order of the Board of Trade (Appendix C) to manufactured tobacco, refined sugar, molasses and extracts from sugar, *e.g.* syrup. It is in view of this limitation that the percentage under paragraph 2 has been fixed as low as 5 per cent. for these articles, the combined effect of the two rules being to allow preference where any of these articles are the result of an appreciable amount of Empire labour, but to confine it to the extent to which the finished article is the result of Empire material.

4. The dutiable articles which for the purpose of charging the preferential rate are considered as manufactured articles are :—

Refined sugar.

Glucose.

Molasses and extracts from sugar (*e.g.*, syrup).

Saccharin.

Manufactured tobacco.

Cinematograph films.

Motor cars, parts, accessories, etc.

Musical instruments, parts, accessories, etc.

Clocks, watches, etc.

All other dutiable goods are regarded as growth or produce. The term refined sugar means sugar which has passed through a refinery.

5. Where goods are manufactured in a bonded factory in Great Britain or Ireland from dutiable material shown to the satisfaction of the Commissioners of Customs and Excise to have been consigned from, and grown or produced in, the British Empire, the duty on the manufactured goods shall, to the extent to which they are shown to have been manufactured out of such material, be charged at the preferential rate.

This provision applies to sugar refiners and tobacco manufacturers who work in bond.

6. The preferential rate of duty must be claimed by the importer at the time of making entry. He is required in every case to substantiate the declarations on the entry that the goods were (1) consigned to the United Kingdom from, and (2) the growth, produce or manufacture of, a part of the British Empire, by means of a certificate of origin in the approved form. He must also, if called upon to do so by the Collector of Customs and Excise, produce any other evidence of origin, such as the supplier's invoice, bill of lading, etc.

7. Certificates of origin are in three prescribed forms, illustrated in Appendices D, E and F to this Notice. Each form comprises two separate certificates, viz.—

(*i*) A certificate that the dutiable articles in respect of which preference is claimed are the growth or produce (Appendix D) or the manufacture or refining (Appendices E and F) of a specified country in the British Empire. This certificate must be given as regards Appendix D, by the overseas grower, producer or supplier, and as regards Appendix E by the overseas manufacturer. In the case of refined sugar, molasses and extracts from sugar, or manufactured tobacco, the amplified certificate (Appendix F), giving also the proportion of Empire-produced dutiable material, must be given by the overseas manufacturer or refiner.

Where, owing to local trade conditions, it is impracticable for certificates of origin in Form D to be signed by the up-country grower or producer, there is no objection to the certificates being signed by their accredited agents in the country of origin having the necessary knowledge of the facts, provided that (1) the certificate clearly shows that the agent is authorized to sign on behalf of the grower or producer, and (2) the certificate is a personal one signed by a responsible member of the issuing firm. This concession does not extend to agents for *suppliers*, nor to agents acting merely as carrying agents.

(*ii*) A supplementary certificate to be given by the actual exporter in cases where the grower, producer, manufacturer, refiner or supplier, who furnishes Certificates D, E or F, is not himself or by his agent the actual exporter and is not in a position to give the particulars of shipment, destination and consignee required to render the main certificate complete. This supplementary certificate is not however required to be given on Forms D, E and F, when the latter are given in conjunction only with Form FF (*see* paragraph 8), in which case its place is taken by a similar supplementary certificate on Form FF.

8. An additional form of certificate (Appendix FF) is required in conjunction with Forms D, E or F where the dutiable article in respect of which preference is claimed is an ingredient only of a complete composite article, and the latter therefore is liable to duty only by reason of containing the dutiable ingredient. This additional certificate is to be given by the overseas manufacturer of the composite goods, as evidence that the dutiable articles, in respect of which preference is claimed and certificate D, E or F has been furnished by the grower, etc., have been used in the manufacture of the composite goods. Certificate E is not required from the manufacturer of the composite goods, as they are not dutiable nor entitled to preference in themselves but only by virtue of the dutiable ingredients they contain. The following examples are given by way of illustration. Manufactured cocoa powder is chargeable to duty in respect of the raw cocoa it contains, and Certificate FF should be given by the manufacturer, supported by Certificate D given by the grower, producer or supplier of the raw cocoa. Chocolate confectionery is chargeable in respect of the raw cocoa and the refined sugar it contains, and certificate FF should be given by the chocolate maker, supported by certificate D from the grower, producer or supplier of the raw cocoa, and Certificate F from the sugar refiner (either or both, according as preference is claimed for either the cocoa, the sugar or both). Jam and condensed milk (sweetened) are chargeable by reference to the sugar they contain, and Certificate FF should be given by the manufacturer, supported by Certificate F from the sugar refiner.

Form FF also contains a supplementary certificate to be given by the actual exporter where the manufacturer of the composite goods who furnishes Certificate FF is not himself or by his agent the actual exporter, and is not in a position to give the particulars of shipment, destination and

* By the term "supplier" is meant any person who, though not being the grower or producer, is the actual overseas owner of the goods at the time of export to the United Kingdom provided he has the requisite knowledge of the facts Such person should be careful to describe themselves on the certificate as "suppliers" and not as "exporters" merely.

consignee required to render the Certificate FF complete. Where this supplementary certificate is given on Form FF it is not to be given on the Form D, E or F relating to the dutiable ingredients.

9. It is to be noted that Certificates D, E and F in all cases apply solely to the dutiable articles themselves (whether imported by themselves or as an ingredient), and that the title of any dutiable article to preference depends solely upon its fulfilling the conditions of Empire consignment and growth, production or manufacture in itself, and without reference to any other ingredients with which it may be associated in composite goods.

10. If composite goods contain more than one dutiable ingredient (*e.g.*, cocoa and sugar in chocolates and confectionery) the appropriate Certificates D, E or F must be given separately in respect of each dutiable ingredient for which preference is claimed, but one Certificate FF may be given to cover all dutiable ingredients contained in one description of composite goods, provided the whole quantity of each such ingredient used in the composite goods is covered by a certificate D, E or F. If however any one dutiable ingredient comprises a proportion covered by a certificate D, E or F and entitled to preference and a portion not so covered or entitled, a separate certificate FF must be given for such ingredient, showing the percentage thereof covered by the certificate D, E or F. The preferential reduction of duty will be regulated accordingly.

For example, if the raw cocoa used in the manufacture of imported Canadian chocolate confectionery is 60 per cent. of Trinidad growth and 40 per cent. of Venezuelan growth, separate certificates on Form FF must be given for the sugar and raw cocoa ingredients, and in the case of the latter the percentage covered by Certificate D must be stated. Preference in the proportion of 60 per cent. will then be allowable as regards the portion of the duty charge attributable to cocoa.

11. If the Collector is satisfied by the production of the certificate or certificates he will forthwith admit the goods to entry as entitled to the preferential rate. The Collector may in any case of doubt or of an incomplete or informal certificate, call for the production of invoices, bills of lading, or any such further evidence as he may require, but pending the production of such evidence he may, unless he has reason to suspect an attempt at fraud, allow delivery of the goods on deposit of the full rate of duty, subject to adjustment, provided satisfactory evidence of the title to the preferential rate is produced without undue delay. In the case of goods entered to be warehoused, the Collector may allow the goods to be deposited in warehouse pending settlement of the rate of duty to which they may be decided to be liable.

12. The preferential rates apply in the case of dutiable goods entered for warehousing, or already in bond, before the 1st September 1919 (in the case of tea before 2nd June 1919), and the particulars of consignment and origin as recorded in the official accounts are usually accepted. The same rule is applied in respect of Empire and non-Empire goods blended or put together in bond before the 1st September 1919. In the case of blends, duty will be charged at preferential rates on the proportion of Empire goods shown to be contained therein. It must be understood that where the official records are not sufficient to establish Empire consignment and origin the onus of proof in all cases rests by law on the importer.

13. In the case of Empire goods consigned to the United Kingdom which have been transhipped *en route* or have been shipped from a foreign port after overland transit from the Empire country of origin, the importer at the time of making entry will be required to produce the through bill of lading or railway consignment note from the country of production to the United Kingdom in support of the certificate of origin. Where a through bill of lading or consignment note is not available, the invoice, local bill of lading or consignment note from the original point of origin and certificate of arrival or landing at, and exportation from, the port of transhipment will be required. Such certificates are to be signed by the proper Colonial or Foreign Customs Officer at the port of transhipment, and in the case of the latter the signature must be visaed by the British Consular Authority. It is essential to prove that the goods were consigned from a part of the Empire to the United Kingdom, and not to a foreign country from which they were subsequently re-consigned to the United Kingdom.

14. In the case of post parcels arriving from a part of the Empire, if the contents are not merchandise for sale and do not exceed £10 in value for

any one addressee, the following short form of certificate will, in the absence of ground for suspicion, be accepted as satisfactory evidence of origin for charging the preferential rate of duty, except in the case of manufactured tobacco, refined sugar, molasses and extracts from sugar:—

> "The contents of this package are not merchandise for sale, and every dutiable article herein is the growth or produce, or, if a manufactured article, is to the extent of at least one-fourth of its present value *bona fide* the manufacture of (Empire country of origin)."

All other post parcels, including all parcels containing manufactured tobacco, refined sugar, molasses and extracts from sugar, etc., will be subject to the ordinary rules of evidence of origin applicable to merchandise generally as set out in the earlier part of this Notice.

15. The prescribed forms of Certificate of Origin are printed as Customs Sale Forms (Nos. 119 to 122), and may be obtained from H. M. Stationery Office direct or through the usual agents.

16. Copies of this Notice may be obtained at any Custom House or office of a Collector of Customs and Excise in Great Britain or Ireland.

STATUTORY RULES AND ORDERS, 1919.

IMPERIAL PREFERENCE

REGULATIONS AS TO THE PROPORTION OF VALUE RESULTING FROM LABOUR WITHIN THE BRITISH EMPIRE.

In pursuance of section 8 of the Finance Act, 1919, the Board of Trade hereby make the following regulations:—

(1) Save as hereinafter provided, goods shall not be deemed, for the purposes of section 8 of the Finance Act, 1919, to have been manufactured in the British Empire unless at least 25 per cent. of their total value is the result of labour within the British Empire.

(2) In the case of those classes of goods in respect of which an Order has been made by the Board of Trade under section 8, sub-section (2) of the Finance Act, 1919, no part of the goods shall be deemed to have been manufactured in the British Empire unless at least 5 per cent. of the total value of the goods is the result of labour within the British Empire.

(3) Where a number of separate articles are included in one parcel or shipment, each and every article shall be considered separately for the purpose of calculating the proportion of value due to labour within the Empire.

(4) For the purposes of these regulations the total value of an article shall be its cost to the manufacturer at the factory or works and shall include the value of containers and other forms of interior packing ordinarily sold with the article when it is sold retail, but shall not include the manufacturer's or exporter's profit of the cost of exterior packing, carriage to port and other charges incidental to the export of the goods subsequent to their manufacture.

(5) In calculating the proportion of value which is the result of labour within the British Empire there may be included under the head of labour the cost to the manufacturer of any materials of purely Empire origin entering into the composition of the article [including the interior packing specified in Regulation (4)], the cost of manufacture including wages, proportion of fuel, supervision and other factory expenses, and the cost of the labour of packing for retail sale.

The following may not be included in the proportion of value which is the result of Empire labour, namely, any materials or interior packings not entirely of Empire origin, manufacturer's profit or the profit or remuneration of any trader, agent, broker or other person dealing in the article in its finished condition, the expenses of placing the goods in outside packages for export and the cost of such packages, transportation charges, insurance and any other charges for services after the goods leave the place of production or manufacture.

(6) Any question arising on the interpretation of these regulations shall be referred to the Board of Trade whose decision shall be final.

C. A. INNES,
Secretary to the Govt. of India.

The following Resolution, issued by the Government of India in the Board of Industries and Munitions, published in the *Supplement to the Gazette of India*, dated the 11th September 1920, is republished for general information.

H. L. STEPHENSON,
Chief Secy. to the Govt of Bengal.

No. M.-36.

Mining and Geological Education.

RESOLUTION.

Simla, the 11th September 1920.

The provision of facilities in India for high grade instruction in mining and geology has for some years past engaged the attention of the Government of India and of the Governments of Bengal and Bihar and Orissa. In 1913 the Government of Bengal appointed a Committee under the Presidency of Sir Duncan McPherson to consider the question of mining education in Bengal and Bihar and Orissa. In 1914-15 another small Committee consisting of mining experts, after examining the system of mining education in England, submitted a report which was in general agreement with the proposals of the McPherson Committee. The Indian Industrial Commission devoted considerable attention to the subject of mining and metallurgical education and dealt with it in detail in Chapter X of their Report. The subject was further examined by the Calcutta University Commission who have embodied their recommendations with regard to mining education in Chapter XLVI, Volume V, of their Report. The Government of India have also had the question under consideration in connexion with recruitment for the Indian Mines Department.

2. The existing provision in India for high grade instruction in geology is even less satisfactory than in the case of mining. The Public Services Commission recommended the early establishment in India of a School of Geology which would rank with similar institutions in Great Britain and give equal opportunities for the scientific study of the subject. The Government of India are aware that the demand for highly trained geologists in India though small is steadily increasing with the growing sense on the part of the educated classes of the opportunities available to them of taking a share in the utilisation of the raw materials of the country. The Secretary of State has recently approved of the view enunciated by the Government of India that the true solution (of the problem of the recruitment of Indians to the Geological Survey of India) is in the early creation of means of instruction such as will enable Indians to attain the necessary qualifications in India. He has further expressed the hope that necessary arrangements will be made without avoidable delay.

3. Under the Reform Scheme only central agencies and institutions for research and for professional or technical training, or for the promotion of special studies will be under the administration of the Government of India and it is only for such agencies and institutions that funds can be allotted from imperial revenues. The provision of high class instruction in geology will obviously fall within this definition. With regard to mining education, it is true that the scheme formulated by the McPherson Committee had for its main object the supply of trained men for the industry in coal mining which is at present largely confined in India to the provinces of Bengal and Bihar and Orissa. It must, however, be recognised that coal mines, as well as metalliferous mines are now being developed in other provinces in India. The Government of India consider that the proposed School of Mines although spoken of as a "school" on the analogy of the terminology long ago adopted and perpetuated in the Royal School of Mines, London, should really be an institution of collegiate rank in which the highest form of teaching in the art of mining and its accessory sciences should be undertaken. It may, therefore, be assumed that there will be no other school like it in India in the near, or probably even distant future. Moreover on account of its unique nature as a high class specialised institution it should be available for students from all parts of the country. The improvement of the mineral supplies of the country is an imperial requirement affecting the general advancement of the country as a whole. In view of these considerations the Government of India have decided that the proposed School of Mines should be an imperial institution.

4. The location of the School of Mines was discussed by the Indian Industrial Commission in paragraphs 169 to 171 of their report. The Commission came to the conclusion that, in view of the great desirability of keeping the mining industry in the closest possible relation with mining education, the school, as recommended by the McPherson Committee, should be established at Dhanbad in the province of Bihar and Orissa. The Calcutta University Commission have enumerated in paragraph 28 of Chapter XLVI of their report the many advantages that Calcutta possesses as the site for an advanced school of mining. The Government of India are inclined to think that the Calcutta University Commission did not fully realize the difficulties that are likely to be experienced by the staff of an institution in Calcutta in keeping touch with the industry of the coal-fields or with the scattered metalliferous mines of India and Burma

5. There are obvious advantages in the establishment of a combined school of mines and geology. In a school of mines, geology must necessarily be one of the prominent subjects and can be developed on a full scale for geologists, whilst the junior courses will be used by those who will specialise in mining. All students will naturally take the junior courses in the foundation sciences, including geology, but they will be allowed to specialise finally in either mining or in geology. It is believed that at the outset the number of students in either course will be limited, and a combined school will be much less expensive than separate schools of mining and geology. The status and efficiency of the entire institution will be enhanced by the combination.

6. The Government of India have, therefore, decided to locate the proposed School of Mining and Geology at Dhanbad. As already stated the school will be imperial and consequently the Government of India will be responsible

for its maintenance and administration. The school will be open to students from all parts of British India and facilities will be provided for the training of youths from Indian States. It is hoped that provincial Governments as well as associations representing industries that will benefit from the teaching of the school will give liberal support in the way of scholarships, travelling fellowships and lectureships. The Government of India desire to make full provision for the adequate representation of provincial Governments and associations interested in the mining industry on the governing body of the school.

7. The following paragraphs represent the tentative views of the Government of India with regard to various details connected with the scope of the proposed school. They will be glad to receive the views thereon of Local Governments and of the Governing Body when it is constituted.

(*a*) As already stated, one of the main objects of the school on the mining side will be to supply trained officials for the coal-mining industry, but instruction in metalliferous mining should also receive due attention.

(*b*) In paragraphs 22 *et seq* of their report the McPherson Committee made recommendations for lower-grade instruction in coal-mining. The Government of India feel that institutions for lower-grade teaching, either in coal or in metalliferous mining, will receive due care from provincial Governments. Close contact is, however, desirable between the teachers of the evening classes in the coal-fields and the staff of the Imperial School in order that the former may be able to keep themselves *au courant* with the latest developments of their profession and to receive advice and information on technical matters.

(*c*) In their report the McPherson Committee dealt with the instruction of mine surveyors. In Europe mine surveyors constitute an important branch of the mining profession and considerable training as well as technical skill is demanded of them. The Government of India feel doubtful whether a one-session course as recommended in the McPherson Committee's report will be sufficient for the adequate training of mine surveyors. At the same time it is open to question whether the requisite training can be usefully imparted at an institution devoted mainly to high grade instruction in mining and geology. This is a point on which the Government of India will await the considered opinion of the governing body of the Dhanbad School as soon as it is constituted.

(*d*) The Government of India are separately considering the recommendation made in the report of the Indian Industrial Commission for the establishment of a metallurgical research institute at Sakchi or Jamshedpur. No definite decision has yet been reached, but they are of the opinion that, should an institution be eventually established there, it will have an entirely separate object and constitution from those of the Dhanbad School. Arrangements may then be made, if necessary, for the interchange of facilities between the two institutions for specialised research and advanced training.

8. The Indian Industrial Commission examined in paragraph 160 of their report the relations that should subsist between an institution like the proposed school at Dhanbad and the Universities. This point was also considered by the Calcutta University Commission in their report In view of the fact that expert opinion is much divided on the question of the affiliation of specialized institutions of this type to Universities, specially to Universities whose centres are situated at a distance from the institutions, the Government of India do not think that it is necessary at least in the initial stages, to affiliate the school at Dhanbad to any University. The Dhanbad institution must, however, maintain contact with the highest form of educational thought, methods and standards. The Government of India, therefore, think it desirable that the Universities of Calcutta and Patna

should be represented on the governing body of the Dhanbad School. They are also of the opinion that, in order that a diploma of the school may carry sufficient value and that its standard may be maintained at a high level, it is essential that, for the purposes of both theoretical and practical examinations in the school, external as well as internal examiners should be employed. There should be specific provision for this purpose in the regulations framed for the school.

9. After careful consideration the Government of India are of the opinion that the governing body of the school should be constituted as below:—

(1) Director, Geological Survey of India. (President.)
(2) Chief Inspector of Mines.
(3) Principal of the College (*ex-officio* Secretary).
(4) One official appointed by the Government of Bengal.
(5) One official appointed by the Government of Bihar and Orissa.
(6) One representative of the Calcutta University.
(7) One representative of the Patna University.
(8) One representative of the Indian Mining Association.
(9) One representative of the Indian Mining Federation.
(10) One representative of the Mining and Geological Institute of India.
(11) One representative of Burma Mining industry to be nominated for the present by the Government of Burma.
(12) One representative of Central Provinces and Berar Mining Association.
One representative of the South India mining industry to be nominated by the Government of Madras. (Alternately for three years.)
(13) and (14) Two non-officials to be nominated by the Government of India.

10. The Government of India are anxious that no time should now be lost in establishing the school on a working basis and they will be glad if provincial Governments and the different bodies referred to in the previous paragraph will kindly indicate their nominations to the governing body at an early date. The Government of India have already applied to the Secretary of State for an early recruitment of a Principal. The Government of India desire that the governing body, as soon as it is constituted, should formulate proposals for—

(*a*) buildings and equipment including class-rooms, laboratories, library, museum, hostels, residences for staff, out-houses, play grounds, etc.

It may be stated that steps are already being taken for the acquisition of a suitable area of land in Dhanbad.

(*b*) Staff and the procedure for its recruitment.
(*c*) Courses of study, examinations, diplomas.
(*d*) Rules of admission, number in each class, fees, scholarships, etc.
(*e*) The constitution of a Council of the staff and regulations providing for the respective powers of the Principal, the staff, the council and the governing body, including any sub-committees which they consider to be necessary for administrative purposes.

The Government of India also desire that the governing body should prepare as early as possible an estimate of the cost of the school both initial and recurring.

ORDERED that the Resolution be communicated to all the Local Governments and Administrations, to the Education Department and the Financial Adviser (Industries), to the Director, Geological Survey of India, to the Chief Inspector of Mines in India, to the Vice-Chancellors of the Calcutta and the Patna Universities, to the Indian Mining Association, to the Indian Mining Federation, to the Mining and Geological Institute of India, and to the Central Provinces and Berar Mining Association.

ORDERED also that the Resolution be published in the *Supplement to the Gazette of India*.

F. R. R. RUDMAN,
Secretary, Board of Industries and Munitions.

The following resolution, issued by the Government of India in the Board of Industries and Munitions, published in the *Supplement to the Gazette of India*, dated the 25th September 1920, is republished for general information.

Conditions for Indian Geological Survey Appointments.

1. Applications for appointment should be made on a printed form to be obtained from the Revenue Secretary, India Office, London, S.W.-1. Appointments are made as occasion may require by the Secretary of State for India on the recommendation of a Committee including one or more geologists. Candidates must, if required, attend at the India Office, at their own expense, for a personal interview. Every candidate must be a British subject, and at the time of his birth his father must have been, and must have since continued to be, a British subject; but power is reserved to the Secretary of State to make exceptions in special cases.

2. The age of candidates should ordinarily not exceed 25, but this rule may be relaxed in exceptional cases. Every candidate must be in sound bodily health, and will be required to satisfy the Medical Board at the India Office of his physical fitness in all respects to perform the duties of the Geological Survey, which involve considerable fatigue and exposure. Unmarried candidates are preferred.

3. Preference will be given to candidates who have served in His Majesty's Forces during the war. Completed years of combatant service will, subject to a maximum of four years, count for pay and promotion, but not for leave, while, as to pension, officers retiring after 20 and less than 25 years' service will be allowed to count a maximum of two years and those retiring after 25 years' service a maximum of three years.

4. Besides a good general education, a sound education in geology is essential; a University degree and a knowledge of French or German will be regarded as important qualifications; and certificates of good character will be required. Candidates must also have had one or two years' practical training in mines or in technical laboratories, as may be required by the Government of India.

5. The sanctioned establishment and pay of the Geological Survey Department are as follows:—

The overseas allowance is admissible only in the case of officers of non-Indian domicile.

A local allowance of Rs. 150 per mensem is granted to the officer doing the work of Palæontologist at headquarters. The officer holding the appointment of Museum Curator receives special Presidency house-rent allowance of Rs. 150 per mensem.

No allowance of the nature of exchange compensation is given.

6. Pay commences from the date of arrival in India. Travelling allowances regulated by the rules applicable to the Department are allowed at a rate calculated to cover actual expenses of tentage and locomotion.

7. A first-class passage to India is given subject to the condition that its cost shall be refunded in the event of an officer resigning the service on grounds other than certified ill-health before the expiry of the period of probation.

8. First appointments are probationary for two years, at the end of which time the probationer, if found qualified and retained in the Department, will reckon his service for leave and pension from the date of arrival in India. If, on the expiry of the period of probation, the officer's service is determined, or if he is compelled by certified ill-health to resign the service before such expiry, he will be provided with a free first-class passage back to England.

9. Under ordinary circumstances all Assistants, unless they have special claims from previous training and experience elsewhere, will enter the Department in the lowest class. The first increase of pay takes effect from the date on which the Assistant shall be declared to have passed the ordinary examination in the language of the country by the first or lower standard, according to the general rules provided for such examinations.

This annual increase will in all cases be granted only on the certificate of the Head of the Department that the Assistants so recommended have fully deserved it by the intelligence and zeal with which their duties have been performed.

10. Promotion to the grade of Superintendent will depend on qualifications and merit and on the existence of vacancies in that grade. While local experience and training must always hold a very prominent place in estimating the position or the promotion of Assistants, it must be distinctly understood that mere seniority of service, unaccompanied by proved ability and steady devotion to duty, gives no claim to promotion into the higher grades of the staff of the Survey.

11. The leave, leave allowances, and pensions of officers of the Department are governed by the provisions of the Civil Service Regulations applicable thereto. These regulations are liable to be modified by the Government of India from time to time. A copy of an abstract of them may be obtained from the Revenue Secretary, India Office, London, S.-W.-1.

10. A physical map of India.
11. A relief map of India.
12. A map of the world on Mollweide's equal area projection and a map of Asia.

It is essential that the students should be provided with atlases, or with the necessary hand-maps, and with a drawing instrument box. Maps for school work should not contain too much detail, or be crowded with names.

II. The following additional equipment is recommended when it can be provided, but the lack of it is not to be considered as a bar to the recognition of the school in Geography :—

1. A thermometer.
2. A mercury barometer.
3. A rain gauge.
4. A small collection of typical rocks, in particular those of the province and of India.
5. A small museum of typical products.
6. A good standard atlas.
7. Geographical pictures.
8. Magic lantern and slides.

(*1*) The attention of teachers is requested to the raised maps of Bengal and Eastern Bengal and Assam made of paper pulp, prepared by Babu Kailaschandra Datta, Head Pandit, Habiganj Government Girls' School, Sylhet, and sold for Rs. 7 and Rs. 5, respectively.

(*2*) Globes of all kinds are made by George Philip and Son, London, W., and A. K. Johnston, London, and Messrs. Ruddiman Johnston, London.

Small hand globes of German make can be obtained through the Indian School Supply Depôt for about a rupee each.

(*3*) The "Comparative" series of large wall maps of the continents published by George Philip and Son is good and up to date; so also are the Orographical wall maps published by Edward Standford. Messrs. Ruddiman Johnston publish a series of smaller wall maps which include maps of India illustrating various distributions.

Messrs. Nelson's wall atlases are good. Mr. S. B. Chatterjee publishes District maps: also ordinary and relief maps of the province.

Babu L. M. Basu, the drawing master of the Dacca Collegiate School, has published good relief maps of Eastern Bengal and Assam and of India.

The Vidal-Lablache French wall maps on strong cardboard, named on one side, and the same map without names on the reverse, published by Armond Colin, Paris, are good and cheap. They measure 46 inches by 39 inches and can be delivered in Calcutta for Rs. 4-14 each.

(*4*) The hand-maps, coloured to indicate relief, published by the Diagram Company, West Barnes Lane, New Malden, Survey, at one penny each, are the best of their kind.

The uncoloured half-penny maps, showing river systems and a few towns, published by the same Company, are excellent for class use.

The Autograph hand-maps, with hill shading in brown, published by Messrs. Edward Standford, London, at one penny each, are very good, and are larger than the Diagram Company's hand maps. The 15-inch map of the world on Mollweide's equal area projection is especially to be commended.

(*5*) Wall pictures of considerable artistic merit are published by Messrs. Edward Arnold of Leeds, Messrs. Hachette of Paris and Messrs. Holzel of Vienna, and Messrs. Longmans Green and Company. They cost, delivered in India, from two to three rupees each.

Map lantern slides and view slides especially prepared for Geography teaching are sold by the Diagram Company for two or three shillings each. Mr. Bartington Smith of Darjeeling also sells good picture slides of the Himalayas at Rs. 15 per dozen.

ELEMENTARY MECHANICS.

The following books are recommended :—

Sir Philip Magnus ...	...	Elementary Mechanics (Longmans, 1903).
A. N. Sen ...	...	Elementary Mechanics.

The following list of apparatus is prescribed as indicating the approximate requirements of a recognised High School seeking to teach Elementary Mechanics for the Matriculation Examination:—

Plumb-line and level.
Simple lever (including brass slotted weights).
Roman steel yard.
Lecture apparatus for experiments on movements.
George's New Atwood's machine.
Stop-watch.
Glazebrook's apparatus (to demonstrate movement of a body).
Hick's Ballistic Balance.
Compound Wheel and Axle.
4 Single Brass Pulleys.
2 Single Brass Pulleys.
2 Triple Brass Pulleys.
Weston Differential Pulley Blocks (½ ton).
16 feet of chain at 6*d.* per foot.
Inclined Plane.
Parallelogram of Forces apparatus.
Wall Crane.
Becker's New Physical Balance.
Set of Gramme Weights (200 grams to 1 mgr.)
2 Composition-ivory Balls.

[NOTE.—The above list is not exhaustive, and much of it might be replaced by similar forms that could probably be made far more cheaply by any clever mistry under proper supervision. In most cases, however, it will probably be found advantageous to buy such a set as indicated in the list specially for demonstration purposes, and subsequently to develop simplified duplicates, illustrating the same principles, which the boys should be given opportunity actually to experiment with on their own individual account or working in pairs.]

Second Forecast of the Sugarcane Crop of Bengal, 1920-21.

[Note.—On an average of the five years ending 1918-19, the area under sugarcane in Bengal has represented some 8·7 per cent of the total area under sugarcane in British India.]

Character of the season.—As stated in the first forecast, the weather at planting time was favourable only in the eastern districts. The drought that prevailed from the months of April to the first part of June affected the growth of the crop to some extent especially in some western and northern districts. Subsequent rainfall proved very beneficial and the present prospects are reported to be favourable on the whole. Damage by drought is reported from the districts of Nadia and Pabna and by flood and heavy rain from parts of Midnapore only.

Acreage.—The total area planted with sugarcane for the province is reported to be 219,500 acres this year, against 218,600 acres and 217,900 acres reported in the corresponding and final forecast of last year.

Outturn.—According to the estimates of District Officers; the Provincial outturn works out to 90 per cent of the normal against 88 and 89 reported respectively in the corresponding and final forecasts of last year.

G. EVANS,
Director of Agriculture, Bengal.

Monthly Weather and Crop Report of Bengal for the month of September 1920.

Character of the season.—During the month under report the rainfall was above the normal in the eastern and northern districts; elsewhere the fall was defective The fall was markedly in excess in Dinajpur, Jalpaiguri, Rangpur, Malda, Dacca, Noakhali and Cooch-Behar. The usual rainfall statement is appended.

2. **Progress of agricultural operations.**—Good rainfall during the earlier part of the month facilitated the transplantation of winter paddy all over the Presidency, especially in the northern and eastern districts. More rain, however, was needed in the western districts. The weeding of winter paddy and the cutting, steeping and washing of jute were in progress. The harvesting of autumn paddy was completed in the districts of Eastern and Northern Bengal, but it was still in progress in some of the districts of Western Bengal. Preparatory tillage for the next spring crops commenced in some districts during the latter part of the month.

3. **State of standing crops.**—The condition of deep water winter paddy and sugarcane was satisfactory and that of transplanted paddy was reported to be fair.

4. **Prospects and probable outturn.**—The present outlook of winter paddy was reported to be promising in almost all the districts of Eastern and Northern Bengal, but in the Western Bengal districts, especially in Nadia, Murshidabad, Jessore, Burdwan, Birbhum and Midnapur rain was badly wanted for the growth of the crop. The outturn of autumn paddy is anticipated to be 85 per cent of the normal.

5. **Damage to standing crops.**—Slight damage to jute and other standing crops by insect-pests was reported from places in Nadia, Jessore and Hooghly. Some damage to winter paddy, specially in the lowlying tracts, was caused by flood and excessive rainfall in Rajshahi, Dinajpur, Rangpur, Bogra, Mymensingh and Tippera. The extent of the damage done was not serious.

6. **Condition of agricultural stock.**—Sporadic cases of cattle disease were reported from nine districts.

7. **Failure of pasturage and fodder.**—There was sufficient fodder in all the districts and no scarcity was felt anywhere.

8. **Prices of food-grains.**—During the second half of the month under review the price of common rice of the cheapest quality rose in six districts, fell in 15 and remained stationary in others. It ranged from 4 seers 8 chittaks per rupee at Darjeeling to 6 seers 8 chittaks in the Chittagong Hill Tracts.

9. **Condition of agricultural population.**—The condition of the agricultural population was fair.

Details.—Further information has been received that the "Campal Light-house" when now in line with the "Malim Light-house" leads over the bar with a depth of one foot more than before.

The soundings taken on the 13th September 1920, at the bar of the Mandavi River, over the leading line of the above-mentioned two marks, and to the south of this line, reveals a least depth of 16 feet at the high water springs.

In the south-west monsoon, owing to the heavy swell, the breakers sometimes extends across the channel, and river is inaccessible for ferry boats.

Remarks.—Further notice will be given when the bar has been re-surveyed.
